Four views of the web app, demo with synthetic data

All images are a demo with synthetic data, captured on 9 November 2026 in a local test environment. They do not establish users, results or current live availability. Please use them only with the label “Demo, synthetic data” and the image credit. The files are available as PNG and WebP in high resolution.

Dashboard with CORE Type

After the QuickCheck, the CORE Navigator dashboard shows the person’s CORE Type, here the example Constructor × Operator, and leads to the personal CORE profile.

Demo, synthetic data

Personal CORE profile: quadrant

The personal CORE profile arranges the four CORE Types Constructor, Operator, Rainmaker and Explorer in a quadrant and shows the points for each type based on the person's own answers.

Demo, synthetic data

Personal CORE profile: intensity by type

The view shows, for each of the four CORE Types, the score based on the person's own answers, split into mindset and experience.

Sprints & Checklists: an active sprint

A sprint in Sprints & Checklists: seven steps over seven days with period, progress bar and the actions Stop and Complete. In the example, one step is ticked off.
